

THE CORPORATE INFORMATION OFFICE AFRL/CCI

The Corporate Information Office (AFRL/CCI) was formed during the laboratory reorganization as a recognition of the strategic importance of information and a response to the Clinger-Cohen Act of 1996.

The seven person group:

- Establishes Information Related Policy for AFRL
- Oversees Corporate Information Initiatives
- Chairs the AFRL Corporate Information Council
- Represents AFRL Information Management
- Reports Directly to the AFRL Commander
- Sits As a Voting Member on the AFRL Corporate Board

Their responsibilities include:

- Perform Information Management Strategic Planning
- Develop Information Resources Management Policy
- Develop Standards Based Information Technology Architecture
- Perform Information Technology Investment Strategy Planning
- Assure Information Protection
- Represent AFRL On AFMC Corporate Information Officer Council
- Represent AFRL On AFMC Information Management Business Area Team and Steering Team

Each of the members of the office bring a unique background and expertise to the information resource area. Here is a photo of each person with appropriate contact information.

The office consists of CIO, CRO and CTO functions with a program manger for the Enterprise Business System program. What's a CIO? CIO - Chief Information Officer (Information Policy/Planning, Oversight of Information Projects). What's a CRO? CRO - Chief Requirements Officer (Business Process Engineering, Information Lifecycle Management). What's a CTO? CTO - Chief Technology Officer (Information Technology Planning, Information Technology Solutions).

The CIO chairs the AFRL CIO Council which consists of the AFRL CIO as chairperson with representatives from the technical directorates - Air Vehicles, Directed Energy, Human Effectiveness, Information, Materials, Munitions, Sensors, Space Vehicles, Propulsion and Power, Office of Scientific Research, and the Research Sites – Wright, Phillips, Rome and Armstrong. This group is the steering body for several subject area integrated product teams including a Year 2000 Team, Info Security Team, Intranet Plan Team, Infrastructure Team, IT Lifecycle Team and EBS Team. The office, in conjunction with the AFRL CIO Council, recently completed the planning for AFRL Core Strategy E: Fully Integrate Our Business Operations with the overall objective of “We will operate as an integrated corporation by using common business processes and by sharing and using information as a strategic resource.” The Corporate Information Office wants to remind you that information is our business, our only business.
